Saint-Gobain's mission statement

« worldwide leadership in the **construction** market, offering **innovative solutions** to meet the challenges of our time: **growth, energy, environment.** »

R&D in Saint-Gobain

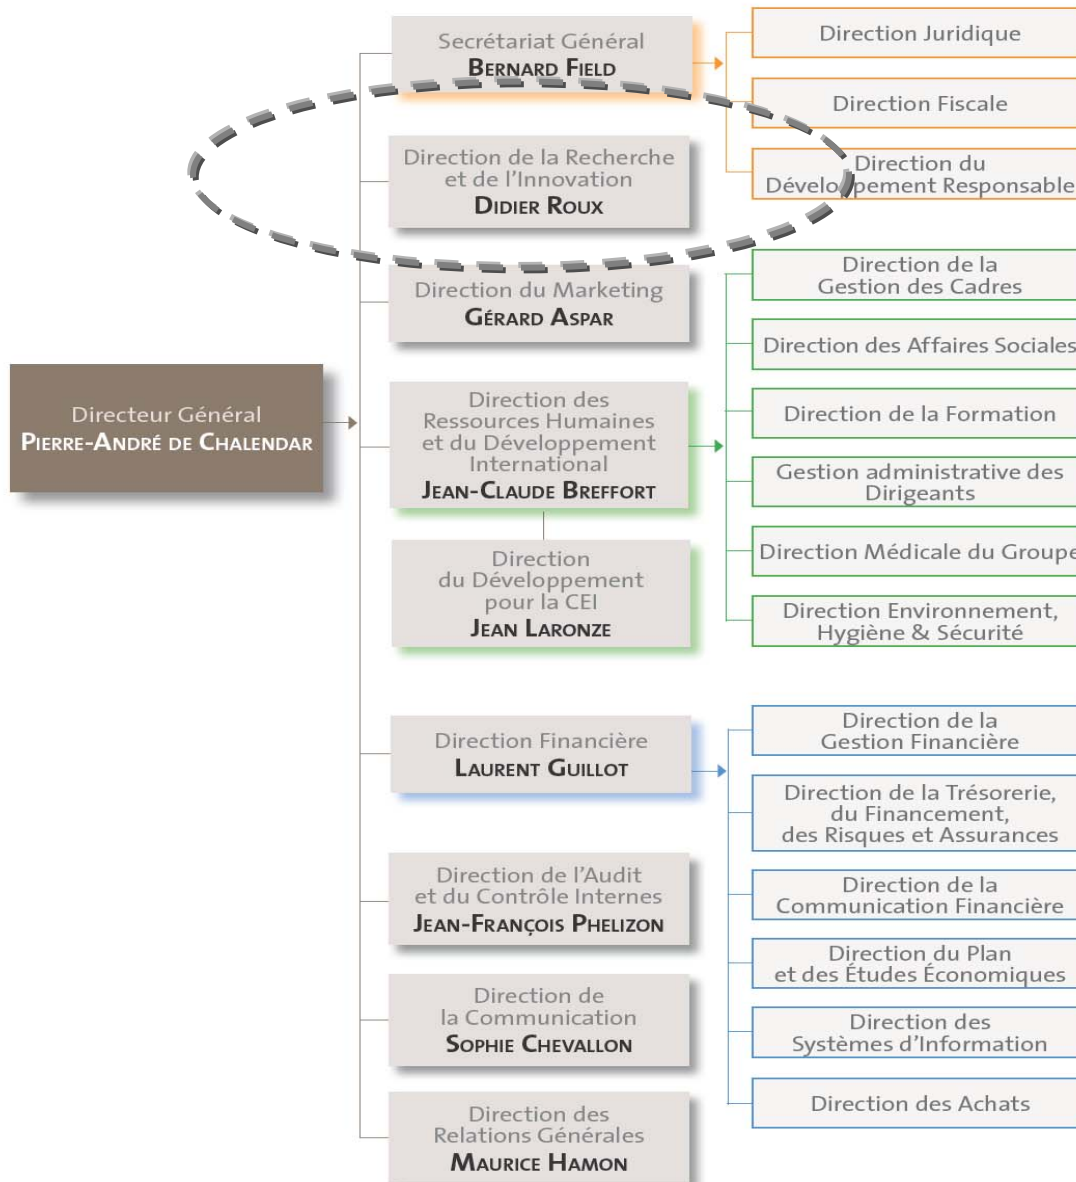

Joseph Louis GAY – LUSSAC – 1778 - 1850

1844 – 1850 President of Saint – Gobain

Business + Science

ORGANIGRAMME DE LA COMPAGNIE DE SAINT-GOBAIN

Septembre - octobre 2009

R&D : figures

USA

Europe

Asia

- > 3 500 employees (~1500 researchers)
- > 390 millions euros in 2007 (growing)
- > 15 research centers + 101 development teams
- > More than 300 new patents filed each year

Development teams in Brazil

Strategic Programs

each SP = portfolio of (sub)programs, R&D projects, actions

Defined by the market that is targeted

- In line with the strategy of the group
- Either of (or both)
 - High cost/risk
 - Across existing Businesses

A specific label for:

- Scrutiny by the Comité de Direction Générale
- Special emphasis in communication
 - Externally
 - Internally

List of Strategic Programs as of Sep 2009

- 1. Solar**
- 2. Lighting**
- 3. Fuel cell: SOFC**
- 4. Active glazings**
- 5. High Performance Insulation Systems**
- 6. Materials from Green Chemistry**
- 7. External Insulation Systems**
- 8. Energy efficient and environment friendly processes**

Saint Gobain is increasing its opening toward outside world

- 1. Collaboration with suppliers and customers**
 - Together Marketing and R&D
- 2. A Market and technological team devoted to emerging markets**
 - TMT Techno Marketing Team
- 3. A Special organization to deal with start-ups**
 - NOVA External Venturing
- 4. An international Academic Network**
 - SUN : Saint-Gobain University Network

2- A Techno-Marketing Team

20 dedicated persons: Europe, US, Asia, mix of marketing and engineers

- **Identify** new applications for existing technologies
- **Assess** emerging markets and technologies
- **Propose** new approaches for new/existing markets

Cross-fertilizing core strengths
Beyond what current BUs already do well
For large market & application potentials

3- An External Venturing initiative

Started 22 months ago by establishment of a **dedicated team** in Europe, US and Asia

Combine ideas stemming from **Innovative start ups** with the **industrial strength and assets** of Saint-Gobain

Variety of working methods: licenses, partnerships, equity investments and joint ventures

~**400** companies reviewed, **4 partnerships** agreed and **20 under active** due diligences or discussion

Focused area: Construction Products, Energy and Environment

Input: from Venture Capital funds + internal (marketing, R&D)

Output: transfer to Businesses (sponsors identified early on)

Can lead to acquisitions providing access to new markets, to codevelopment partnerships, or simply stimulates our R&D !

Start-ups currently under study

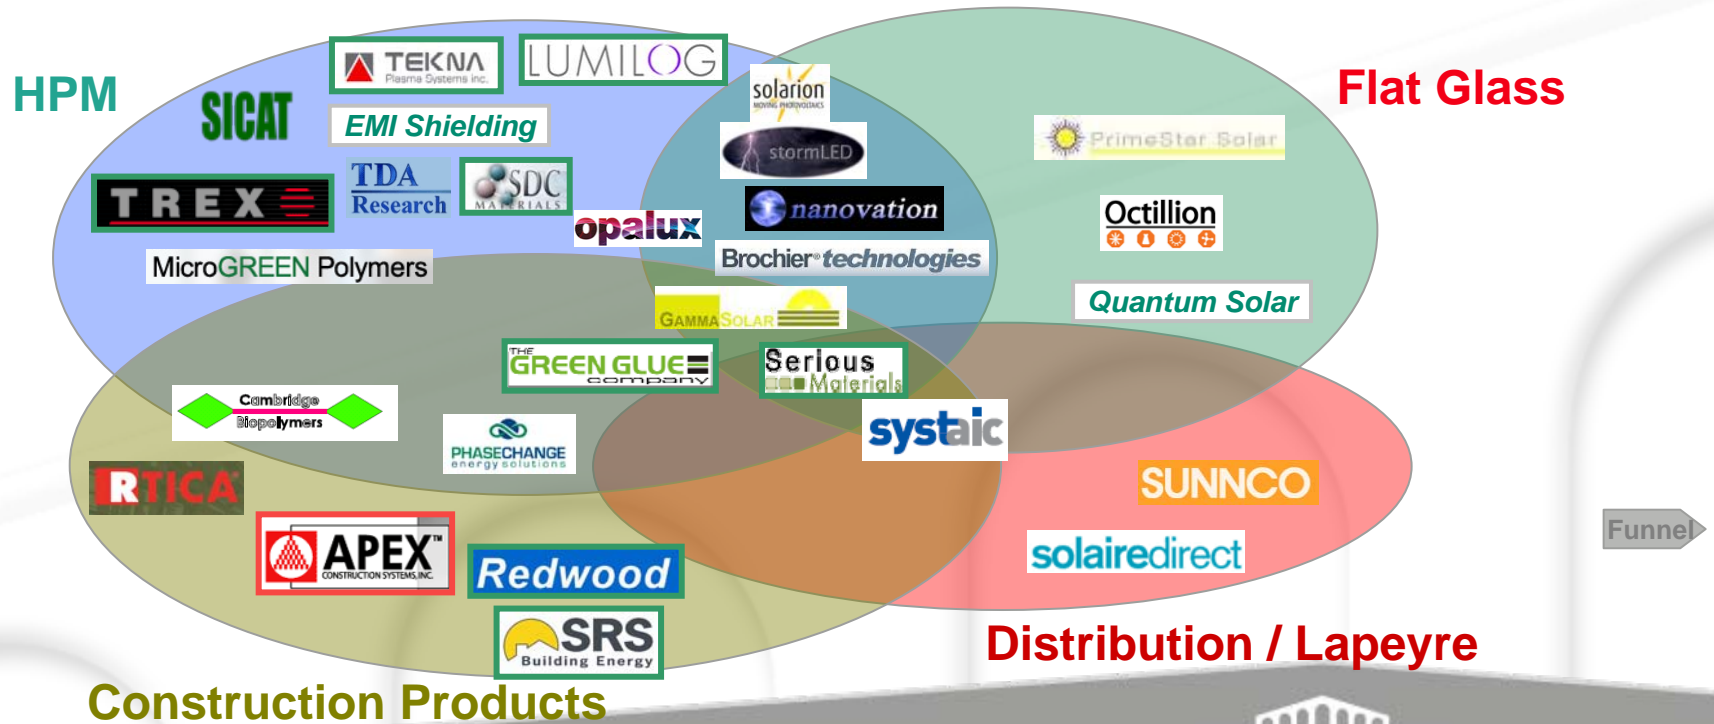

- At last meeting we had 25 active projects, and since

➤ 8 new active start-ups :      

➤ 4 stopped projects :    SUPERIMAGING

Breakdown of the 29 Active start-ups today (“HOT”, “BU Lead”)

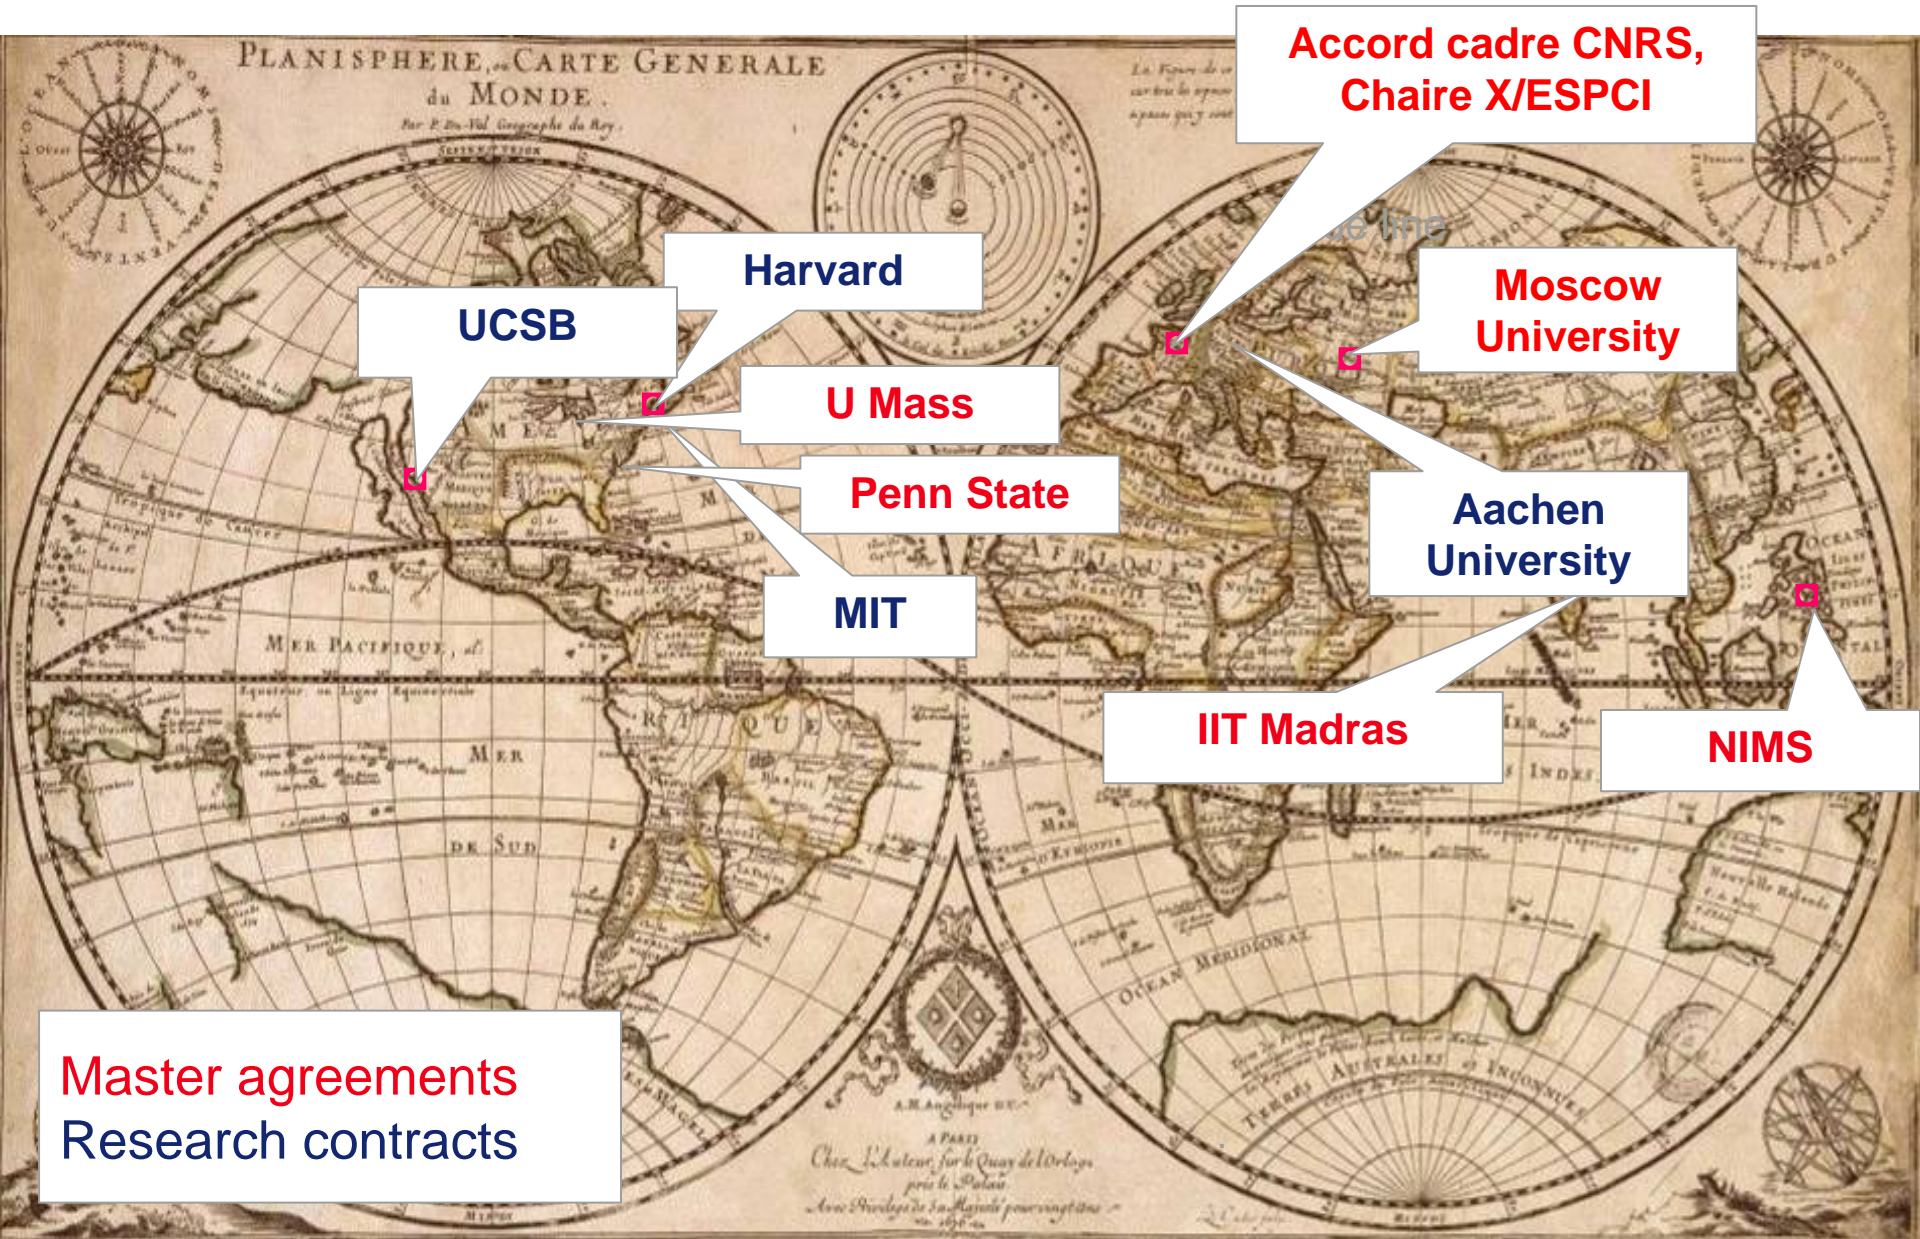

4- An academic network

Saint-Gobain University Network: **SUN**

- To develop long-term interactions with the best research teams in our domains
- To keep an eye on technological developments
- To hire of students from top universities in countries of strategic importance for Saint-Gobain by making our technologies better known
